Item specifics

Condition: Used: An item that has been previously used. The item may have some signs of cosmetic wear, but is fully ... [Read more](#) Model: Tatung Einstein

Brand: Tatung

This is my Tatung Einstein which, sadly, needs to go. It really looks even better than the photos show. It is as close to "as new" conc present, everything works. The various connectors are untested but all look like new.

I have removed the lid to show the inside is as good as the outside.

It comes with 5 disks including two versions of the operating system, CP/M and BBCBASIC.

Does it work? Yes, it does. The pictures show booted to system monitor, started the operating system and loaded into BBCBASIC. picture would be better through a monitor but, sadly, I don't have a compatible colour one. This is into a TV (and an LCD one at that)

If you are collecting computers then this is a fantastic find. They did not sell particularly well so are fairly rare. In this condition, it mu but often sold as untested. This one is tested and working including the single Sony 3 inch disk drive. It will come with all original ma the 5 disks pictured.

The Einstein was an extremely well built computer. It used the same chips as the MSX computers so has sprites, high-quality sound keyboard is very high quality and the power supply is heavy duty. Its failing was cost which ensured poor sales so no interest in writir old computers though, this is a major find - a perfect example.

Happy to post in a well padded box.

There is no buy-it-now and the auction will run to the end. The starting price is a reflection of how good this computer is.

I hope it will go to a good home.

UK mainland only for postage, I am afraid. If you wish to collect then you are welcome to do so from near Lincoln.
