Item specifics

Condition: Used

Seller notes: "These computers can suddenly develop faults due to age. Not been cleaned. So sold as seen. I have Tested it briefly. Powers up, keys worked, 1st disk working. Tested, but i suspect it works. Colour monitor powers up but no cables to connect it to the einstein, so not been tested further. Monitor has crack on top outer casing. Joystick not tested, but was working when last used in 1990s. No warranty on any of these items Flat screen monitor NOT included. Was able to use this flat screen monitor in analog TV mode to do a directory (dir) search on some of the 16 disks in remember how to run the programmes. So disks not tested any further than dir search. Some disks had bad sectors, some not. Was able to load the xt program. Whats written on the disks may not be whats actually on the disks."

Vintage:	Yes	Country/Region of Manufacture:	United Kingdom
Model:	Tatung Einstein	Brand:	Tatung
Manufacturer warranty:	None		

Tatung Einstein TC01 Vintage 'MSX' Computer with Twin disk drives. TM01 colour monitor, 3 manuals, and 16 various backup disks (copy of the essential xbas program.

I do not know if the disks contain whats written on the disks, or if the programs work. I cant remember how to load them and dont have dir search as shown in one of the pics. Some of the disks do have bad sectors. I think they all have one side that works, but not tested.

All 3 manuals in good readable condition.

A cable is included that will connect this computer to an old analog television. Analog television not included but used for illustrative purposes.

Monitor and computer as shown in pics. Computer worked when tested. Monitor powered up. All Keys worked. Only tested briefly.

Unable to test the Joystick. It was bought brand new by us in 1988, and was working when we last used it in the late 1990s. Not been used since. This computer package has been owned by us for well over 20 years, but not been used for at least 18 years.

I have not attempted to clean this computer or monitor, as I have no knowledge on how it should be cleaned. I do know these keyboards are difficult to clean, so my advice is dont try clean it!!! This computer has been stored in our bedroom with a cover over it for the last 18 years or so. Redecorating in progress.

**buyer must collect, as these computers are too easily damaged in the postal system. No warranty on any of these items due to age. Sold as collectors items.**
