Brand: Tatung

Model: Tatung Einstein

Tatung Einstein TC01, For Spares Or Repairs. Condition is "For parts or not working"

This machine does not turn on, and the person i got it from said "it went pop when they tried it".

I have had a look and it appears the PSU has blown. There is white residue on some of the components, but the fuse looks to be intact.

This is beyond my level of testing/fixing. I don't do power related repairs!!

Clean looking machine, some yellowing. The metallic badge is missing as is the front right plastic foot.

Only 1 drive installed, there is a gap where there was once a second drive. Inside there is a drive cable with 2 connectors.

Keyboard feels good with no obvious stuck keys, but as this is untested, there may be keyboard issues.

Rear ports look clean with no bent pins.

Serial no: 6031096, so one of the later machines produced.

Good for someone's retro collection as these are fairly rare. Bonus if you can get it fixed and running.

Sold as untested for spares and repair., but does come with a full set of manuals!

Shipping via eBays Packlink, using UPS insured.

I will not ship this outside of the UK as the costs of shipping would be excessive!!

Due to this machines age and none tested/none working state, there is NO Returns!
