Tatung Einstein Computer + Box

RARE 1984 UK Manufactured Z80 based computer, featuring hardware sprites, three channel sound and a great quality keyboard. It only sold in small numbers, and thanks to it's built in PSU, the machine is rather hefty slab of 1980s chic. Surely one of the biggest 1980s home computers ever produced.

Unboxed but fully tested and in Excellent physical condition, gives a nice clear TV output, and all keys checked. We could not get it to boot from the built in three inch disc drive, but probably just needs a replacement band. Includes RF cable and some data discs.

The outer box is very tatty, 3/10, and doesn't include inner packaging.
